TECHNICAL SKILLS SUMMARY

- **Languages:** Python, C++, Java, JavaScript, SQL, HTML/CSS, C#, C
- **Development:** React Native, Expo, Flask, REST APIs, Firebase, Supabase (PostgreSQL), Docker
- **AI/ML & Data:** PyTorch, scikit-learn, Pandas, NumPy, Machine Learning, LLMs
- **Embedded & IoT:** ESP32, Arduino, UART, Sensors, Embedded Systems, IoT Development
- **Tools:** Git/GitHub, Linux, VS/VS Code, Postman, Arduino IDE, Onshape, M-Office suite

PROJECTS

PillPal - Smart Medication Reminder System | ESP32 • Firebase • React • Arduino • Onshape | May 2026

- Designed and built a smart pill dispenser that improves medication adherence through LEDs, vibration motors, a buzzer, and magnetic reed switches.
- Developed a real-time dashboard for medication scheduling, device monitoring, and missed-dose tracking.
- Designed a modular 3D-printed enclosure with removable medication compartments and integrated electronics.

Precision Agriculture Sprayer Drone | Pixhawk, ArduPilot, ELRS, Embedded Systems | Jul 2026

- Built and flight-tested a remote-controlled agricultural drone integrating a Pixhawk flight controller, ELRS radio communication, FPV, power electronics, and a custom liquid spraying system.
- Designed the platform toward autonomous precision agriculture using LiDAR and machine learning to identify affected plants and enable targeted spraying instead of treating entire fields.

LegalAI – AI-Powered Legal Assistant - Hackathon | Feb 2025

- Developed an AI-driven application to interpret landlord-tenant legal queries in Ontario using NLP techniques.
- Designed structured and unstructured data flows using JSON-based legal datasets.
- Built backend services with Python and Flask to process user queries and generate responses.

BlockBuilt - 90-Day Fitness Tracker | React Native, Expo, TypeScript, Supabase | Aug 2026

- Developing a full-stack mobile application with customizable workout plans, calendar-based tracking, daily check-ins, progress/achievement tracking, notifications, and persistent user data.
- Built a responsive voxel-inspired interface with reusable components, scheduling utilities, notification infrastructure, and Supabase backend integration..

EDUCATION AND AWARDS

Bachelor of Computer Science (Honours) | Conestoga College, Waterloo, ON

Sept 2024 – Present | Expected Graduation: 2028

Velocity Cornerstone Award | University of Waterloo

Going the Distance Award - PillPal

LEADERSHIP & COMMUNITY

Board of Directors, Student Representative - eCampusOntario, Ontario, Canada | Apr 2026 – Present

- Serve as the College student representative on a provincially funded Board of Directors supporting digital learning across Ontario's postsecondary institutions
- Contribute to strategic discussions on innovation, accessibility, and technology-enabled education

IT Club, Conestoga College, Conestoga Student Club Lead | President | Volunteer | Sept 2025 – Present

- Organize technical workshops and campus events, coordinate with student organizers, develop promotional materials, and support beginner-friendly technical sessions.

Google Developer Group (GDG Waterloo) | Community Member | Volunteer | Teaching Assistant | Mar 2026 – Present

- Support technical workshops, talks, and community events while collaborating with organizers and speakers to increase student participation.
