OBJECTIVE

AI-focused **Computer Science** student with hands-on experience in machine learning, **data analytics**, and applied AI systems. Strong background in **Python**, **SQL**, **statistics**, and **model development**, with experience translating real-world data into actionable insights. Seeking an **AI Scientist Co-op position** at **CIBC** to apply advanced analytics and machine learning to impactful financial use cases.

TECHNICAL SKILLS SUMMARY

Data Science & AI

- Machine Learning (classification, nearest neighbour, model evaluation)
- Predictive Analytics & Forecasting (introductory)
- Natural Language Processing (LLM-based systems, prompt design)
- Statistics & Data Analysis

Data Tools & Technologies

- Apache Spark (foundational knowledge)
- Git / GitHub (version control, collaboration)
- Docker (model & app containerization)

Programming & Databases

- Python (data analysis, ML pipelines, APIs)
- SQL (queries, joins, aggregations, data extraction)
- C++, C, Java, JavaScript, R

Data & Visualization

- Git/GitHub, Docker, Linux/Ubuntu, Windows
- Streamlit (data apps & dashboard)

ACADEMIC PROJECTS

Machine Learning Phone Orientation Detector - Winter 2025

- Designed and implemented a **Nearest Neighbour classification model** to predict smartphone orientation using 3D gravity vector data.
- Performed **feature analysis**, **distance calculations**, and **model validation** to improve prediction accuracy.
- Applied **statistical reasoning and algorithmic optimization** to evaluate model performance.
- Delivered an end-to-end ML prototype from experimentation to tested deployment.

Task Management Console Application - Winter 2025

- Developed a structured data management system using **custom data models and file-based storage**.
- Implemented input validation, unit tests, and integration tests to ensure reliability.
- Focused on data integrity, robustness, and maintainability.

DriveTracker - Mobile Driving Analytics App

- **React Native**, **Supabase (PostgreSQL)**, Data Analytics
- Built a data-driven mobile application to collect, store, and analyze **GPS-based driving data**.
- Designed SQL queries to compute driving scores, historical trends, and performance summaries.
- Translated raw trip data into clear visual insights for end users.

Smart Stadium Management System (Smadium) - Fall 2025

- Designed database-backed system supporting structured data access and reporting.
- Assisted with data organization, access control, and integrity across system modules.
- Collaborated on documenting system behaviour and technical requirements.

LegalAI - AI-Powered Legal Assistant (Hackathon) - Winter 2025

- Built an **AI-driven NLP system** to interpret legal queries for Ontario landlords and tenants.
- Designed structured and unstructured data flows using **JSON-based legal datasets**.
- Integrated **LLM-powered insights** into a user-friendly analytics interface.
- Collaborated cross-functionally to translate complex legal data into actionable guidance.

EDUCATION AND VOLUNTEERING

Bachelor of Computer Science (Honours)

Conestoga College, Waterloo, ON

Sept 2024 – Present | Expected Graduation: 2028

Secretary – IT Club, Conestoga College, Fall 2025 – Present

- Prepared meeting summaries, documentation, and reports.
- Managed records and coordinated information sharing among executive members.

Soft Skills

Collaboration & Professional Skills

- Strong analytical communication skills, able to explain technical results to non-technical audiences
- Experience collaborating in cross-functional and diverse teams
- Self-directed learner with a strong interest in applied AI and financial analytics
- Values trust, accountability, and teamwork
